

What is claimed:

1. A banking envelope made from a blank of material comprising
 - a rectangular back panel having parallel long sides, parallel short sides, an inner surface and an outer surface,
 - a generally rectangular front panel having opposing long sides, opposing short sides, an inner surface and an outer surface,
 - a first of said long sides of said back panel joined to a first of said long sides of said front panel,
 - a generally rectangular inner panel having opposing long sides and opposing short sides,
 - a second of said long sides of said back panel joined to a first of said long sides of said inner panel,
 - a first end flap having a side joined to a first short side of said back panel and a surface bonded to one of said inner surface and said outer surface of said front panel,
 - a second end flap having opposing sides, an inner surface and an outer surface,
 - a first of said opposing sides of said second end flap hingeably joined to a second of said short sides of said back panel,
 - one of said surface of said second end flap and a surface of said front panel having a slot therein, and
 - a tab on the outer of said second of said second end flap and said front panel for removably engaging said slot for removably joining said second flap against a surface of said front panel.

2. The banking envelope of claim 1 wherein advertising material for a first institution is applied to said outer surface of said back panel and advertising material for a second institution is applied to said outer surface of said front panel and where first and second institutions are different from one another.

3. The banking envelope of claim 2 wherein one of said first and second institutions is the issuer of said banking envelope and the second is not associated with said issuer of said banking envelope.

4. The banking envelope of claim 3 wherein said second institution has a physical location in near proximity to said first institution.

5. The banking envelope of claim 1 wherein said surface of said first end flap is bonded to said one of said inner surface and said outer surface of said front panel by an adhesive that allows the subsequent separation of the parts without causing damage thereto.

6. The banking envelope of claim 5 and further comprising
a perforation separating said back panel from one of said inner panel, said front panel, said first end flap and said second end flap.

7. The banking envelope of claim 6 and further comprising advertising material for an institution other than the institution issuing said envelope printed on said one of said inner panel, said front panel, said first end flap and said second end flap.

8. The banking envelope of claim 7 and further comprising advertising material for the institution from which said envelope was issued printed on an outer surface thereof other than said one of said inner panel, said front panel, said first end flap, and said second end flap.

9. A banking envelope for transferring currency to a banking customer comprising
an envelope body having a plurality of outer surfaces thereon,
said envelope retained together by means that allow said envelope to be disassembled without damage to the parts thereof,
said disassembled envelope forming a blank comprising a plurality of joined panels,

a perforation between a first and a second of said panels of said blank, and
advertising material for a first institution applied to one of said outer surfaces and
advertising material for a second institution is applied to a second of said outer surfaces
where first and second institutions are different from one another.

10. The banking envelope of claim 9 wherein one of said first and second
institutions is the issuer of said banking envelope and the second institution is not
associated with said issuer of said banking envelope.
